Jonatan Daugbjerg Bjerrekær

Product Design Engineer | Design Systems, UX & Front-End Collaboration | Turning Complex B2B Products Into Clear, Usable Interfaces

Region Midtjylland, Danmark

Resumé

Hi there! I'm a Product Design Engineer with a background in UX/UI design, technical interaction design, and front-end collaboration. My work sits between product strategy, user experience, and implementation quality, especially in complex B2B software. At Adtraction, I design product features and flows from early research and concept work through high-fidelity design, prototyping, developer handoff, and quality review in production. I also own and maintain the design system and motion system, working closely with developers on a shared React component library to keep design decisions practical, accessible, and technically feasible. My strength is making complex product surfaces easier to understand, easier to build, and better aligned across design, product, and engineering. Currently open to new opportunities where I can apply this mix of design and engineering thinking to meaningful product work.

Erfaring

Adtraction

2 år 7 måneder

Product Design Engineer

marts 2026 - Present (3 måneder)

Aarhus

Hybrid product design and UX engineering role bridging product strategy, user experience, and implementation feasibility across Adtraction's internal platforms.

Owns end-to-end product design from research and concept work to high-fidelity design, prototyping, implementation support, and design quality in production.

Key focus areas:

- Designing product features and flows across interaction design, visual design, accessibility, prototyping, and developer-ready specifications.
- Translating customer insight, research, and feedback into prioritized UX improvements.
- Partnering with product management on requirements, goals, roadmap direction, and platform development priorities.
- Working closely with developers throughout implementation to support technical feasibility, design-to-code quality, and product QA.
- Owning and maintaining the design system, motion system, and design documentation across components, styles, variables, and usage standards.
- Collaborating on the shared React component library / UI Toolkit to keep product design and implementation aligned.

UX Engineer

november 2023 - maj 2026 (2 år 7 måneder)

Aarhus, Central Denmark Region, Denmark

As the lead UX-Designer I;

Help analyze key business needs and requirements within different user groups. Balancing user needs vs. user wants. "Don't ask the customer what they want, watch what the customer does." - Jakob Nielsen

Work closely with developers, relevant stakeholders and product owners.

Collaborate with IT project manager around priorities and timelines.

Translates technical requirements into real world use cases and deliverables for our development team.

Help remove roadblocks to ensure an agile improvement in deliverables.

Viborg Karate Skole

Instruktør

februar 2012 - Present (14 år 4 måneder)

Viborg

Now once a week teaching people the art of selfdefence starting from the age of 4 to and well above the age of 40 || Co-organising multi-day international karate summer camps.

Skills learned/learning:

- Interpersonal and Communication

- Strong Management and Leadership
- Speaking in front of an audience

Adservice A/S

Overordnet designer

april 2022 - marts 2024 (2 år)

Adservice A/S has been bought and fused with Adtraction AB as of early 2024

As a Lead UI/UX Designer, I have:

- Single-handedly developed a design system in Figma for 4 big internal websites, saving time and effort and ensuring a consistent look and feel through all interfaces adhering to the brand image and design. Constantly looking for ways to improve the design system, incorporating new Figma features and UX best practices.
- A proven track record of designing and coding in Angular2 external websites for clients and internal for staff.
- I worked closely with developers, ensuring high standards of UX through rigorous Quality Assurance (QA). Collaborating closely, I reviewed functionality and design meticulously, guaranteeing adherence to Adservice's brand design and common design principles and UX best practices. This collaboration resulted in consistently delivering exceptional user experiences.
- I led the design, development and coding (Angular2) of new external websites for our clients with an average result in 8K new consumer leads for the client within the first two weeks, and an increase in website traffic and a 18% increase in leads generated on their website.
- Proven track record of developing and maintaining complex internal interfaces and salestools. I was responsible for the development and maintenance of four different internal systems in Figma, including the company's intranet, CRM system, and ERP system. I have a strong understanding of system development life cycles and I am proficient in Figma and front-end experience with Angular2 programming language and technologies.
- Redesigned internal and external email templates, resulting in a 22% increase in open rates and click-through rates.

No Zebra

9 måneder

UI/UX Associate

december 2021 - april 2022 (5 måneder)

Aarhus, Midtjylland, Danmark

Assists in Figma UI/UX Benchmarks for client websites, e.g. What works, what doesn't work and how can it be improved.
